## HOW TO MEASURE YOUR FEET

If you're unsure which shoe size you are, follow these simple steps.

**FIT TIP:** Measure at the end of the day when your feet are at their largest.

### STEP ONE

Place the paper on the ground and stand on it with your weight slightly forward to make sure you foot is flat.

### STEP TWO

Draw a line behind your heel and another line in front of your longest toe. It is common to have one foot longer than the other, so use the longer foot to measure.

### STEP THREE

Measure the distance between lines in inches or centimeters. Find your measurement on the Muck Boot size guide to figure out the best. Round up if your size falls in between.
